Item #AFRAMCABS – Starting @ \$0.30 / carat

How to use the Twins

So, just recently Pantone announced for the first time ever, two colors of the year, rather than just one. The implication for the Jewellery industry can be immense, here is which stones you can pair up to use in your Jewellery:

1. Rose quartz (baby pink) and Sky blue topaz (Or Chalcedony), make simple two stone rings and jewellery symbolizing pastel, light, soothing shades.
2. If you have both target markets for Men and Women, you can make Jewellery for her and for him together to be marketed as engagement rings. The engagement rings can be a "Ceylon Blue sapphire" and a "Pink Sapphire". For her, the pink sapphire, for him, the Ceylon light baby blue sapphire.
3. If you are a big retailer. You'll get every once in a while mom's there to buy jewellery for their twin babies. Niche but targeted.
